Expériences QA Analyst

From 12-2023

Projet : Open banking

Client : **SWAN**

Location : Paris, France

Main objectives and accomplishments :

As a QA Analyst at Swan, a startup specializing in banking as a service, my mission is to ensure the quality and reliability of our products. I am responsible for setting up tests, identifying bugs, and working closely with the development team to guarantee an optimal user experience. My role directly contributes to customer satisfaction and the reliability of our services, ensuring the speed and security of our financial solutions..

- o Conduct manual regression testing and evolutions
- o API testing (GraphQL)
- o Writing test cases
- o Drafting detailed test reports, including documenting bugs, and communicating the results to the relevant teams.
- o Working closely with the development and product teams
- o Detection and analysis of anomalies
- o Validation of corrections

Technologies : POSTMAN, GraphQL

01-2020 –
12-2023

Senior Test Consultant

Project : QA Transvesre et multi-projet

Client : Mousquetaires INTERMARCHÉ

Location : Chatillon, France

Main objectives and accomplishments :

As a QA tester, I am responsible for validating the components delivered for acceptance testing. My role as a cross-functional QA tester across multiple projects involves planning, organizing, and executing tests to ensure that the results are compliant with project requirements and meet business needs. I work closely with the development team to quickly resolve identified issues and share my knowledge to improve test quality.

- o Planning, preparation, and execution of acceptance testing
- o Anticipation of test prerequisites (QA environment, documentation, business rules, access and synchronization with development teams, test data)
- o Preparation and execution of test scenarios
- o Production of test reports and summaries
- o Tracking of anomaly workflow: detection, analysis, traceability
- o Knowledge management in test repositories
- o Organization of progress meetings
- o Coordination with development and project teams
- o Writing of acceptance testing report
- o Participation in Agile rituals

Technologies : SQL, Python, Confluence, Jira, Agile, Scrum ; POSTMAN, Rest, SoapUI

Environnement : CLOUD AZURE

09-2018 to
11-2020

Test Lead

Client : BNP Cardif (Centre de test)

Main objectives and accomplishments:

During my assignment at BNP Paribas Cardif, I held the position of acceptance testing lead at the test center for data-related projects, as well as for the implementation of a claims portal for customers. As an acceptance testing lead, I was responsible for planning and monitoring the execution of acceptance testing, by managing resources and the automation part..

- o Elaboration of the provisional testing schedule
- o Writing and updating the test strategy
- o Gathering business requirements
- o Retrieving and anonymizing test data
- o Tracking and managing testing resources
- o Organizing workshops with project stakeholders
- o Managing test design
- o Updating ALM (Application Lifecycle Management)
- o Tracking testing progress
- o Organizing and conducting test campaigns
- o Communicating test results
- o Detecting and analyzing issues
- o Validating corrections
- o Conducting regression testing
- o Writing test reports

Tools : SQL, HP ALM, SAS

09-2016 –
08-2018

Test Lead

Client: **AG2R**

Project : **DEMAT IJSS**

Main objectives and accomplishments :

As part of the DEMAT IJSS project, I was in charge of managing the testing on the AG2R management centers throughout France. The project aimed to implement a simplified process with automated transmission of IJSS statements and to integrate the necessary changes to accommodate the statements sent by CPAM.

- Writing and updating test strategies
- Allocation and organization of test resources
- Coordination between different project stakeholders
- Preparation and facilitation of progress meetings:
 - Testing point
 - Project committees
 - Business point
- Preparation and facilitation of user workshops
- Test management
- Setting up test cases on ALM/QC
- Application maintenance (managing anomalies and evolutions)
- Reporting on project progress

Tools : HP ALM
